What Can We Do For A Landowner ?

We have technical expertise, manpower, and funding available to work on projects on private and public lands. We can help you obtain expert advice on how to best accomplish a project you are considering for your land. If your project fits within the guidelines of one of our funded problems, then we may be able to assist with the cost of the project. However, we only become involved in projects at the invitation of the landowner. You are free to consult with us and then decide not to go forward with the project. Providing information about natural resource issues is one of our most important goals.

RCD-Sponsored Stream Care Workshop

Landowners may rent the RCD's "No Till" Drill

Since we are locally based, we have the opportunity to work out local solutions to natural resource issues and thus avoid "solutions" imposed by outside regulation. We support a balance between utilization and conservation of our natural resources, and we are available to assist property owners to do the same. We are committed to finding local solutions to local natural resource issues.

WHAT IS A RESOURCE CONSERVATION DISTRICT?

THERE ARE OVER 3,000 CONSERVATION DISTRICTS IN THE UNITED STATES, WITH 103 "RCD'S " IN CALIFORNIA. AN RCD IS NEITHER "PRO ENVIRONMENT" NOR "PRO UTILIZATION". RATHER, RCD'S OPERATE AS CLEARINGHOUSES OF INFORMATION ABOUT FARMING, RANCHING, TIMBERLANDS, AND WATER AND SOIL RESOURCES. RCD'S ARE COMMITTED TO SOUND MANAGEMENT OF NATURAL RESOURCES ON BOTH PUBLIC AND PRIVATE LANDS.

THE TRINITY COUNTY RESOURCE CONSERVATION DISTRICT WAS ESTABLISHED IN 1956, AND IS GOVERNED BY A BOARD OF DIRECTORS APPOINTED BY THE BOARD OF SUPERVISORS.
